

AURORA COMPONENTS - INVESTOR PRESENTATION FY2025

September 2025

Synthetic sample for demonstration purposes.

Growth Strategy

Revenue has compounded at 24% annually since FY2023.

We target 15-18% annual revenue growth over the next three years, driven by international expansion and new automation product lines.

Our Customer Base

We serve a highly diversified customer base across 14 industries.
No single end market represents a material share of demand.
Diversification insulates revenue from sector-specific downturns.

Margin Trajectory

We expect gross margin to recover toward 40% as the Poland facility ramps.

Operating margin expansion of 100-150 bps per year is targeted from FY2027.

Balance Sheet Strength

We maintain a disciplined capital allocation framework.

Recent investments position us to reduce leverage over the medium term.

Summary

Aurora combines strong growth with an increasingly global footprint.

Appendix: figures consistent with the FY2025 annual report.
